KEY SQL QUERIES

N

Content Distribution by Country

```
SELECT country, type, COUNT(*) AS title_count,
  ROUND(COUNT(*)*100.0/SUM(COUNT(*)) OVER(),2) AS pct
FROM netflix_titles
WHERE country IS NOT NULL
GROUP BY country, type
ORDER BY title_count DESC
LIMIT 10;
```

Top Genres & Avg Release Year

```
SELECT genre, COUNT(*) AS count,
  ROUND(AVG(release_year),1) AS avg_year
FROM (
  SELECT TRIM(value) AS genre, release_year
  FROM netflix_titles,
  json_each('["' || REPLACE(listed_in,', ','","') || '"]')
)
GROUP BY genre
ORDER BY count DESC LIMIT 5;
```

N

01

Analyzed 8,807-record Netflix catalog across 748 countries

Conducted end-to-end EDA in SQL identifying content distribution patterns, missing data (30% director field null-rate), and release year trends from 1925–2021.

02

Uncovered 4.6× content growth between 2016–2019 via time-series analysis

Parsed and transformed date fields to track annual catalog additions, revealing a peak of 1,999 titles added in 2019 and quantifying a platform scaling trend for strategic insight.

03

Wrote optimized SQL to surface top genres and country-level share metrics

Authored multi-CTE and window function queries (PARTITION BY, OVER) to compute percentage breakdowns -showing US content at 32% of catalog and TV-MA at 36% of all ratings.

KEY TAKEAWAYS

- Netflix's catalog is 70% Movies and 30% TV Shows across 8,807 titles
- The United States dominates production at 32%, followed by India at 11%
- Content additions peaked in 2019 at 1,999 titles -a 4.6× increase from 2016
- International Movies & Dramas are the #1 and #2 genres on the platform
- TV-MA rating accounts for 36% of all content -majority targets adult audiences
